

# IT Services

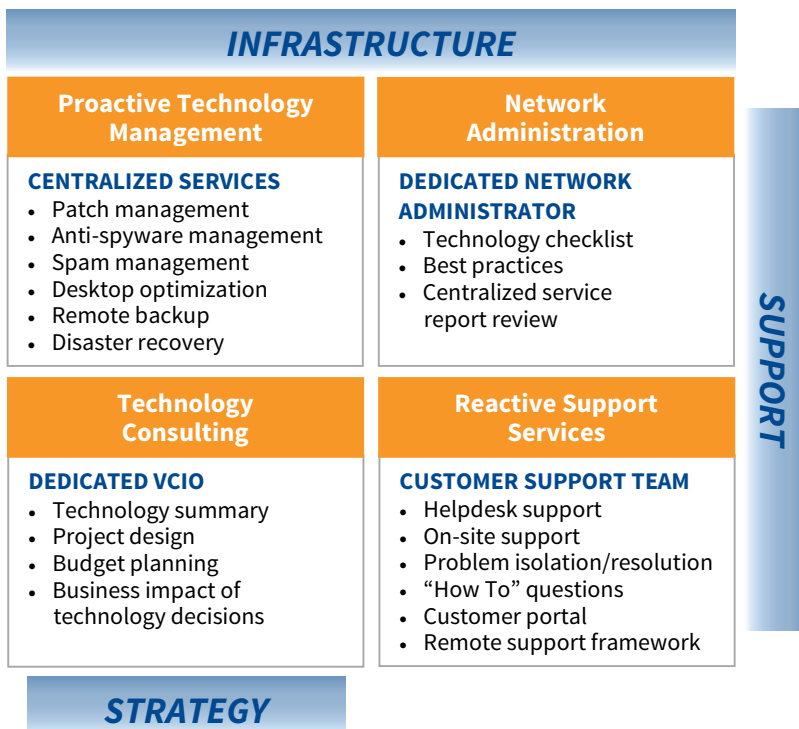

If there is one thing technology is not, it's stagnant. SpireIT was founded by a group of entrepreneurial CPAs, who understand what it takes to make businesses grow. We know that without professional, timely, and quality IT service, businesses could suffer from inefficient work flow and unnecessary downtime. Built on the similar platform as our successful CPA firm, SpireIT believes in the traditional values of providing exceptional client service and strengthening long-term relationships with our clients.

Our team includes qualified network engineers and skilled business consultants. We work with a variety of industries and learn the key processes behind each of our clients. From network and desktop support to software selection and implementation, our team is standing by ready to help your organization achieve its maximum potential. Relying on outdated technology and failing to utilize the tools available to you can impact your business' bottom line. We remain committed to providing you with the most current technological solutions to meet your business' evolving needs.

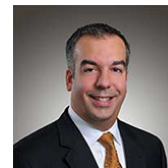

## Our services include:

- Managed IT and network support
- Cloud-based applications
- Secure cloud and on-site backup and disaster recovery
- VoIP telephone systems
